***Allowable Subject Matter***

1. Claims 1-28 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The prior art made of record fails to teach/show a controller configured to selectively control the fuel injection valve to use a first fuel injection timing when the controller determines that a stratified air-fuel mixture will be difficult to form during a second fuel injection timing based on a determination of the engine operation parameter by the at least one sensor, the first fuel injection timing being set to control the injection valve to inject the first fuel stream during an intake stroke while a piston in the combustion chamber is approximately at an intake top dead center position such that a majority of the first fuel stream injected from the fuel injection valve is received inside a cavity formed on the piston.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***
